

CIVIL ENGINEERING SOCIETY 2026-27

EVENT : *KNOW YOUR BRANCH*

Date: September 25, 2026

Time: 5:00 PM IST

Venue: Chandrasekhar Hall, NIT Warangal

INTRODUCTION

The Civil Engineering Society (CES), NIT Warangal, organized an orientation and interactive session titled "**Know Your Branch**" on September 25, 2026, at Chandrasekhar Hall. Designed under the theme "*From Foundations to Skylines: Structures • Infrastructure • Design*," the event aimed to introduce students to the diverse core domains within Civil Engineering, bridging academic concepts with contemporary industry applications. The session featured structured presentations and interactive discussions led by eminent faculty members, including **Prof. G. Rajesh Kumar** (Structural Engineering & Concrete Technology), **Prof. N. V. Uma Mahesh** (Water Resources & Hydrology), **Prof. G. Venkata Ramana** (Geotechnical & Pavement Engineering), and **Prof. Vasudha Dattatraya Katare** (Construction Technology & Management, BIM & Sustainable Materials).

Event Objectives

- **Domain Awareness:** *To provide students with comprehensive insights into different sub-disciplines within Civil Engineering.*
- **Faculty Interaction:** *To facilitate direct engagement between students and faculty experts across various specializations.*
- **Academic Guidance:** *To help students align their elective choices, project work, and career pathways with their core areas of interest.*
Welcome Address & Introduction
- **Industry Integration:** *To showcase how foundational principles scale to modern infrastructure and structural design.*

Detailed Event Flow & Program Schedule

Time	Segment	Details & Speakers
17:15	Welcome Address & Introduction	Opening remarks and welcome note outlining the vision of the event.

17:20	Faculty Insights & Interaction (Structures)	Prof. G. Rajesh Kumar <i>Topic:</i> Structural Engineering & Concrete
17:50	Faculty Insights & Interaction (Water Resources)	Prof. N. V. Uma Mahesh <i>Topic:</i> Water Resources & Hydrology.
18:20	Faculty Insights & Interaction (Geotechnical & Pavement)	Prof. G. Venkata Ramana <i>Topic:</i> Geotechnical & Pavement Engineering.
18:50	Faculty Insights & Interaction (Construction Management & BIM)	Prof. Vasudha Dattatraya Katare <i>Topic:</i> Construction Technology & Management, BIM & Sustainable Materials
19:20	Vote of Thanks	Acknowledgment of faculty members, student organizers, and participating first-year students
19:25	Refreshment Distribution	Informal interaction and networking session with refreshments

Participants

- **Target Audience:** B.Tech 1st Year Civil Engineering Students.
- **Student Participation:** The event saw active attendance from the first-year batch, filling Chandrasekhar Hall.
- **Interactive Engagement:** First-year students enthusiastically participated in the Q&A segment following each speaker's presentation
 - Key queries raised by students focused on:
 - Course pathways and choosing electives in upper semesters.
 - Emerging software tools like BIM, AutoCAD, and structural analysis software.

- Research, internship, and career prospects in both core engineering sectors and higher education.

Key Highlights & Takeaways

- **Structural Engineering & Concrete Technology:** *Prof. G. Rajesh Kumar highlighted advancements in durable concrete materials and structural mechanics essential for modern high-rises and resilient infrastructure.*
- **Water Resources & Hydrology:** *Prof. N. V. Uma Mahesh provided perspectives on hydrological modeling, sustainable water management practices, and climate resilience in water resource systems.*
- **Geotechnical & Pavement Engineering:** *Prof. G. Venkata Ramana discussed sub-surface soil mechanics, foundation engineering, and highway pavement design standards critical for modern transport networks.*
- **Construction Technology & BIM:** *Prof. Vasudha Dattatraya Katare introduced contemporary tools, focusing on Building Information Modeling (BIM), eco-friendly construction materials, and digital project management techniques.*

Conclusion

*The "**Know Your Branch**" event successfully served as an inspiring orientation for the incoming first-year batch, offering a complete overview of the Civil Engineering domain. By connecting fundamental principles to modern engineering practices—from foundations to skylines—the session empowered first-year students to navigate their B.Tech journey with clarity, enthusiasm, and confidence.*

By connecting fundamental principles to modern engineering practices—from foundations to skylines—the session empowered first-year students to navigate their B.Tech journey with clarity, enthusiasm, and confidence.
